

How do you spot conversion therapy practices?

A good way to identify conversion therapy is to see whether or not the provider believes that any identities outside of being cisgender and heterosexual is morally wrong and/or can be changed.

Some other names and practices that conversion therapy may be disguised as are:

- ⚠ Reintegrative therapy
- ⚠ Desistance therapy
- ⚠ Sexuality counselling
- ⚠ Healing sexual brokenness
- ⚠ Gender exploratory therapy
- ⚠ Encouraging relational and sexual wholeness
